FLOOR STANDING TROUGH URINAL

Models FSTU1200 – FSTU3000 | Floor standing, 316 stainless steel, removable front service panel

A stainless steel floor standing trough urinal, made to order in our own factory in Ashbourne, Co. Meath. Stainless steel won't crack, chip or stain the way ceramic can, and is quick to clean and keep hygienic.

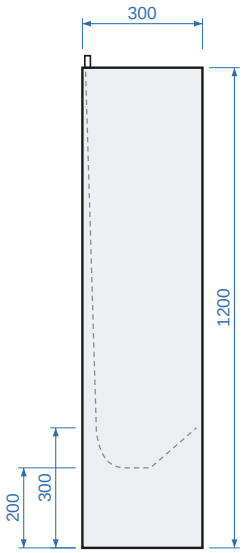

A concealed stainless steel sparge pipe rinses the trough. The supplied urinal waste can be positioned at the far left or right, and a removable front service panel gives easy access to the pipework.
